Premium Quality Lightweight Oil Only Absorbent Pads

Premium Quality Lightweight Oil Only Absorbent Pads

Low-linting Premium Oil Only Absorbent Pads preferentially absorb oil, whilst repelling water. The Low-linting Premium Oil Only Absorbent Pads will remove oil from water and are used in internal and external situations where oil needs to be absorbed without saturating the absorbent with water.

The Low-linting Premium Oil Only Absorbent Pads have a polypropylene core with a fine fiber layer on both sides. This procedure makes the pads extremely low-linting and improves the absorption ability (wicking) and strength of the material.

The Low-linting Premium Oil Only Absorbent Pads are perforated so that it can be adjusted for all kinds of applications.

Applications:

the Low-linting Premium Oil Only Absorbent Pads are ideal for use in factories, on lakes, rivers, harbors or at sea and will remain afloat even when saturated with oil.

- 100% meltblown polypropylene covered with a fine fiber layer on both sides; won't rip, tear or fray even when saturated
- Will absorb up to 25 times its own weight
- Dimple pattern speeds wicking of liquid throughout the material for faster, easier cleanup
- Absorbs and retains oils and oil-based liquids—including lubricants and fuels—without absorbing water
- Floats to clean up spills on water
- Bright white color makes absorbed oil easier to see; draws attention to machine leaks and clearly shows saturation level during spill response
- Perforated material is easy to tear to size so you only use what you need
- Low-linting Premium Oil Only Absorbent Pads are ideal for catching drips and soaking up spills
- Flame-resistant material won't burn immediately like cellulose; melts when exposed to high heat while on the job
- Nontoxic, non-reactive and fast acting

Parameters of product

Length (cm):	40
Width (cm):	50
Absorption (Liter/Unit):	67
Weight (kg):	4.1
Number of pads per unit:	100
